Appendix 3. Number of macaúba palm (*Acrocomia aculeate*) cavities suitable for nesting by Blue-fronted Amazons tabulated by habitat type, status (standing-up or fallen) and by disturbed status (disturbed one or more times by poachers or undisturbed). Data were collected in Central-West Brazil from 2016–2024.

Habitat	Status	Poacher's action		Total
		Undisturbed	Disturbed	
Agriculture	Standing-up	0	3	3
	Fallen	80	275	355
	Total	80	278	358
Pastures	Standing-up	162	163	325
	Fallen	162	779	941
	Total	324	942	1266
Wetland	Standing-up	18	22	40
	Fallen	10	50	60
	Total	28	72	100
Total	Standing-up	180	188	368
	Fallen	252	1104	1356
Grand total		432	1292	1724
