

Appendix 2

Table A2.1 The range of the 90% credible interval for each habitat combination for the species richness for passerines and non-passerines. Bolded boxes indicate credible intervals that do not overlap zero, and thus have different estimated species richness.

	Δ Marsh & Rice	Δ Riparian & Rice	Δ Riparian & Marsh
Passerines	(11.17, 16.25)	(17.22, 22.90)	(3.32, 9.30)
Non-passerines	(-0.25, 4.53)	(4.66, 9.54)	(2.33, 7.60)
